Professional Objective

To leverage my AI and Data Science expertise, along with strong programming and full-stack development skills, to drive innovation and contribute to the growth of a forward-thinking organization.

Education

St.Mary’sWomen’sEngineeringCollege Guntur Bachelor of Technology, Artificial Intelligence & Data Science (74%)	2021 - 2025
Krishnaveni Junior College Narasaraopet Board of Intermediate Education, MPC (98%)	2019 – 2021
ZP High School Tripuranthakam Board of Secondary Education, SSC (97%)	2018 –2019

Internship

AWS on Cloud Computing | AWS May 2023 – June 2023

- Gained hands-on experience with AWS cloud services, focusing on key concepts like EC2, S3, and RDS.
- Worked on real-time projects, applying cloud computing.
- principles to solve practical challenges. Developed and deployed scalable applications on the AWS platform.Collaborated with a team, enhancing both technical and communication skills

Software Development Intern

- I had successfully completed on Software Development Intern in Cognifyz Technologies ,Worked on real-time projects applying technical skill Such as python language

Project

Automated Road Damage Detection Using UAV Images and Deep Learning Techniques

- Automated Road Damage Detection approach using Unmanned Aerial Vehicle (UAV) images,deep learning techniques and Artificial Techniques
- Approach utilizes three algorithms, YOLOv4, YOLOv5, and YOLOv7, on deep CNN for object detection and localization in UAV images. We trained and tested these algorithms using a combination of the RDD2022 dataset from China and a Spanish road dataset
- Develop a deep learning-based system to detect road damage from UAV→ images
- Tools/Technologies : Python, TensorFlow/Keras, OpenCV, UAVs.

Library Management System Web Application

- Deployed A Web application Using HTML ,CSS , Javascript
- This software package is developed using html , bootstrap for front end . Php and MY SQL Server as the back end to store the database for backend we are using Xampp server.

Loan Insurance System Web Application

- Deployed a Web Application Using Using Django Framework in Python
- A loan management application built with Django , SQLite3, JavaScript, HTML, CSS, and Bootstrap

Skills

- | | |
|-----------------------|--------------------------|
| • Programming Using C | • Database |
| • Java | • MS Office |
| • Python | • SQL |
| • Excel | • Software Testing |
| • Web Development | • Good Knowledge in SDLC |

Achievements

Certificates: Java, Data Science, C & Data structures, Hackathon

Awards:

- ❖ Achieved silver medal in Java Intern upon successful completion of project.
- ❖ Impressive score of 78% in the Java certification exam, earning the prestigious Elite+ badge certificate,showcasing proficiency in programming and dedication to continuous learning.
- ❖ District-level second place achieved in a science exhibition, demonstrating passion and interest in the field of science

Hobbies & Interests

- | | |
|-----------------------------|-----------------|
| • Leadership & Volunteering | Quick Learning |
| • Learning New Technologies | Problem Solving |

Declaration

I hereby declared that the above information is correct to the best of my knowledge, and I bear the responsibility for the correctness of above-mentioned particulars
